Cathi Murray
People In Need of Environmental Safety
P.O. Box 216
Beverly Shores IN 46301-0216

Dear Ms Murray:

You indicated that the PRPs for the Pines Superfund site have asked you for items related to section BB of the TAP agreement. As we discussed yesterday, it was our intention and understanding that the needs of BB, and the rest of the TAP agreement as it overlaps with GHI's agreement with PINES, was met with the following general statement from our agreement:

Work performed by GHI under this Agreement will be limited to and consistent with that of an independent technical advisor as defined and discussed in the TAP agreement.

Notwithstanding that understanding and intention, and at your request, Geo-Hydro, Inc. herewith explicitly addresses the items of section BB. The PRP's, of course, already know fully well there is no conflict of interest, so their bringing the issue before PINES has nothing to do with that concern. The most generous light that can be placed on the request is that it is a retentive need to make sure each *i* is clearly dotted and each *l* is clearly crossed.

BB. 1. To the best of its and their knowledge, Geo-Hydro, Inc. and its employees and principals have no financial and business relationship with any potentially responsible party ("PRPs") at the site, with PRP parent companies, subsidiaries, affiliates, subcontractors, contractors, and current clients or attorneys and agents. This includes past and anticipated financial and business relationships, and services provided to or on behalf of such parties in connection with any proposed or pending litigation. Geo-Hydro, Inc. and its employees and principals also disclose that they have little knowledge of the universe of corporate or individual persons that comprise "PRP parent companies, subsidiaries, affiliates, subcontractors, contractors, and current clients or attorneys and agents", whether in the present, past, and future. If the PRPs would like to disclose such persons for the present, past and future, Geo-Hydro, Inc. and its employees and principals will be happy to provide the same disclosure for each identified entity.

BB. 2. Certification: Geo-Hydro, Inc. certifies that, to the best of its knowledge and belief, it has disclosed to PINES all information available or known to it related to each "financial and business relationship with any potentially responsible party ("PRPs") at the site, with PRP parent companies, subsidiaries, affiliates, subcontractors, contractors, and current clients or attorneys and agents. This includes past and anticipated financial and business relationships, and services provided to or on behalf of such parties in connection with any proposed or pending litigation. such information" and no other information exists that is available or known to Geo-Hydro, Inc.

Certified this 24th day of August, 2005 by

as individual and President of Geo-Hydro, Inc.

BB. 3. Geo-Hydro, Inc. will disclose to P.I.N.E.S. immediately any such information discovered after submission of its bid or after award.

I hope this meets your needs with respect to the information the PRPs are seeking at this time. If not, please give me a call. In the hope that this is a unique request and that it is not the first an endless sequence of demands for the arcane and picayune, I will not charge for this effort. The limited funds you have been granted should not be dissipated on this kind of thing.

Sincerely,

Charles H. Norris
